

14h00: Linda WITTKOP, Christophe TZOURIO, Rodolphe THIEBAUT - Welcome

Session 1
14h05-14h30
Chairs:
Frantz THIESSARD

DATA RE-USE

Aaron AYLLON-BENITEZ (PhD student, team ERIAS)
Methods for integrating heterogeneous knowledge sources for a unified annotation of gene sets
Jean Noel NIKIEMA (PhD student, team ERIAS)
Integration of heterogeneous biomedical knowledge based on support ontologies
Mickael ARNAUD (PhD student, team Pharmacoepidemiology)
Prioritization of potential drug safety issues using observational healthcare databases

Session 2
14h30-15h20
Chairs:
Linda WITTKOP
Antoine PARIENTE

DISABILITY SURVIVAL

Diana BARGER (PhD student, team MORPH3EUS)
The 4th 90 : Quality of Life (QoL) in People Living with HIV in Aquitaine
Sandra LE GUYADER-PEYROU (PhD student, team EPICENE)
Social inequalities impacts of care management and survival in patients with non-hodgkin lymphomas (ISO-LYMPH)
Marine ROUSSET (PhD student, team Pharmacoepidemiology)
Determinants of the efficacy and toxicity of kinase inhibitors treatments used in metastatic melanoma
Bénédicte MERLE (PostDoc, team LEHA)
Nutrition and ocular health
Caroline GIULIOLI (PhD student, team Psychoepidemiology of aging and chronic diseases)
Markers of cognitive functioning in the oldest old
Sarah SCHROYEN (PostDoc, team Psychoepidemiology of aging and chronic diseases)
Ageism in oncology
Camille CARLES (PostDoc, team EPICENE)
Exposure to pesticides and electromagnetic fields: Development of assessment tools in the general population and application to brain tumors

Session 3
15h20-15h50
Chairs:
Karen LEFFONDRE
Jean-François DARTIGUES

CHRONIC DISEASE

Remi KABBORE (PhD student, team Biostatistics)
Graft failure in pediatric kidney transplant
Eric FRISON (PhD student, team VINTAGE)
Metabolic disorders and dementia risk
Virginie NAEL (PhD student, team LEHA)
Visual impairment, cognition and dementia
Bachirou TADDE (PhD student, team Biostatistics)
Modelling causal links between anatomic, cognitive and functional spheres in the context of Alzheimer disease: a latent process approach

Session 4
16h00-16h30
Chairs:
Rodolphe THIEBAUT
Carole DUFOUIL

MULTIDIMENSIONAL DATA

Marie-Gabrielle DUPERRON (PostDoc, team VINTAGE)
Genetic determinants of dilated perivascular spaces
Murali SARGURU (PostDoc, team VINTAGE)
Genome-wide: Gene and Environment interaction study of brain MRI marker - White matter hyperintensities
Marius KWÉMOU (PhD student, team SISTM)
Selection of control periods in large case-crossover studies with application to pharmacoepidemiology
Hadrien LORENZO (PhD student, team SISTM)
Statistical analysis of longitudinal data applied to the evaluation of the response to vaccine

Session 5
16h30-17h15
Chair:
Isabelle BALDI

PREVENTION

Ilaria MONTAGNI (PostDoc, team HEALTHY)
Youth-friendly health services: from knowledge to access
Mélanie PLAZY (PostDoc, team IDLIC)
How to reach universal access to HIV care and treatment?
Delphine PERRIAT (PhD student, team IDLIC)
Integration and generalization of "Universal Test and Treat" (UTT) strategies in sub-Saharan Africa. The ANRS 12249 TasP trial and beyond
Eric TELLIER (PhD student, team IETO)
Predicting Wave and Tide related injuries
Julie ARSANDAUX (PhD Student, team HEALTHY)
Self-esteem among university students, its determinants and consequences. Toward a public health intervention to improve health and academic future

17h15: Linda WITTKOP, Christophe TZOURIO, Rodolphe THIEBAUT - Concluding remarks
